

# NumberGym

We have now converted to a database version of NumberGym Maths. This version will store pupils' best times in **BondBuilder, TableTrainer and Mental Maths Challenge**. Pupils can now log in from home and carry on from where they left off at school and teachers can run reports on their progress.

## STEP 1. Go to Numbergym.

At home, children will have go to: <http://www.numbergym.co.uk> then go to the section that says Online Access.

## Step 2. Enter School login details.

They need to enter the school login and password, see below.

St George's login detail for NumberGym at home.	<b>Login: stgeorges</b> <b>Password: gordon</b>
---	--

## Step 3. Children enter their login details.

When asked to they will now have to **enter student login**, this is the same as their USO username (The same one used for LGFL and Purplemash), however Numbergym will not accept full stops, therefore full stops have has been replaced by a hyphen. See example below.

<b>USO username: smitj123.308</b>
is replaced by
<b>Numbergym student login: smitj123-308</b>

No password is required as they are already logged into the St. George's NumberGym account.

**Your child's username can be obtained from the class teacher.**
